Music & Video Library Preparation for DJs

Your music. The right versions. Ready for the next event.

Bring local library review, event requests, organized copies and verified backups into one preparation workspace.

Organize with control

Review folder moves, reuse genre destinations, edit supported tags and undo recorded changes. Keep clean, explicit, intro and remix versions distinct.

Prepare client events

Match requests to local music, review Mixx missing songs and prepare event-named folders or playlists for supported DJ workflows.

Include music videos

Preview organized video copies in a separate destination. Keep originals and their existing DJ-library paths unchanged.

Protect your collection

Review duplicates, copy missing versions and create verified file backups. Conflicts and unsupported preservation cases stay visible.

$7/app · $12/suite per month

Planned founding pricing · Selecta Vault + Selecta Mixx
2 drives included · $3/month per additional drive · 50 total maximum

Approved future pricing: $9/app or $15/suite for new subscribers six months after public launch; existing founding subscribers retain founding rates. Planned 30-day beta for both apps without a card. Subscription service is not yet live.

Beta availability: macOS Apple-silicon preview; public release remains pending. Record-pool/API access depends on provider approval and your membership. DJ integrations use app-specific crate, import or handoff workflows; they are not universal native-library or cue/beatgrid conversion. Store links do not provide automatic purchasing or streaming downloads.
